France, (4) LESIA, Observatoire de Paris, France

The CDPP

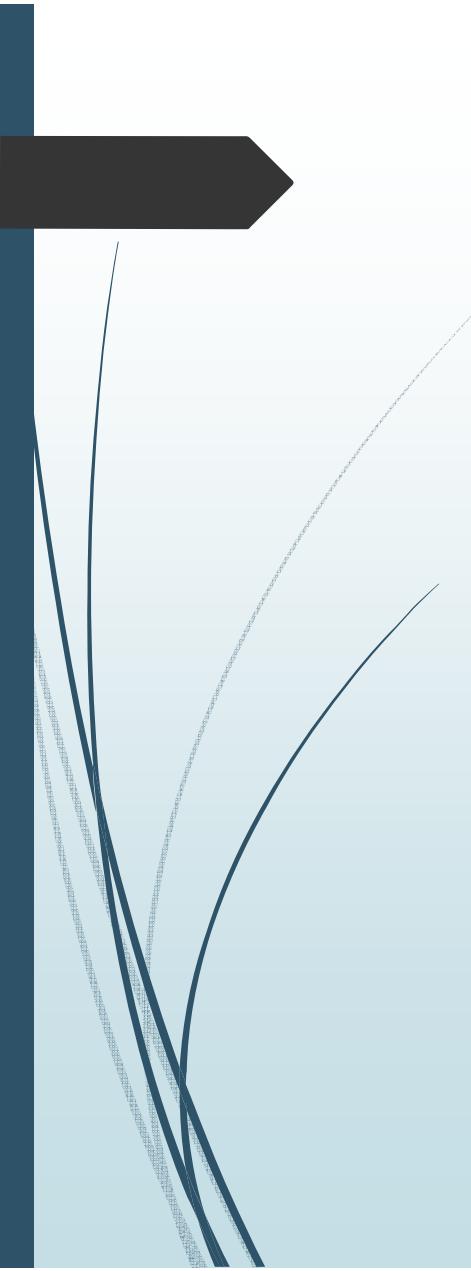

- ▶ Is established in 1998 in Toulouse by CNRS and CNES to archive plasma physics data for space mission with French participation
- ▶ Is a gathering of both scientists and engineers who participate voluntarily or as part of their duty
- ▶ Widens its scope since 2006 when AMDA is open and simplifies data access, visualization and analysis
 - ▶ In particular those from NASA/PDS
- ▶ Participated and participates in several Virtual Observatory projects whose aim is also to simplify data access, visualization and analysis
- ▶ Is part of the data distribution pipeline for Solar Orbiter (SWA) and JUICE (RPWI)
- ▶ Distributed data from the Rosetta Plasma Consortium (RPC) during the proprietary period

Plan de l'exposé

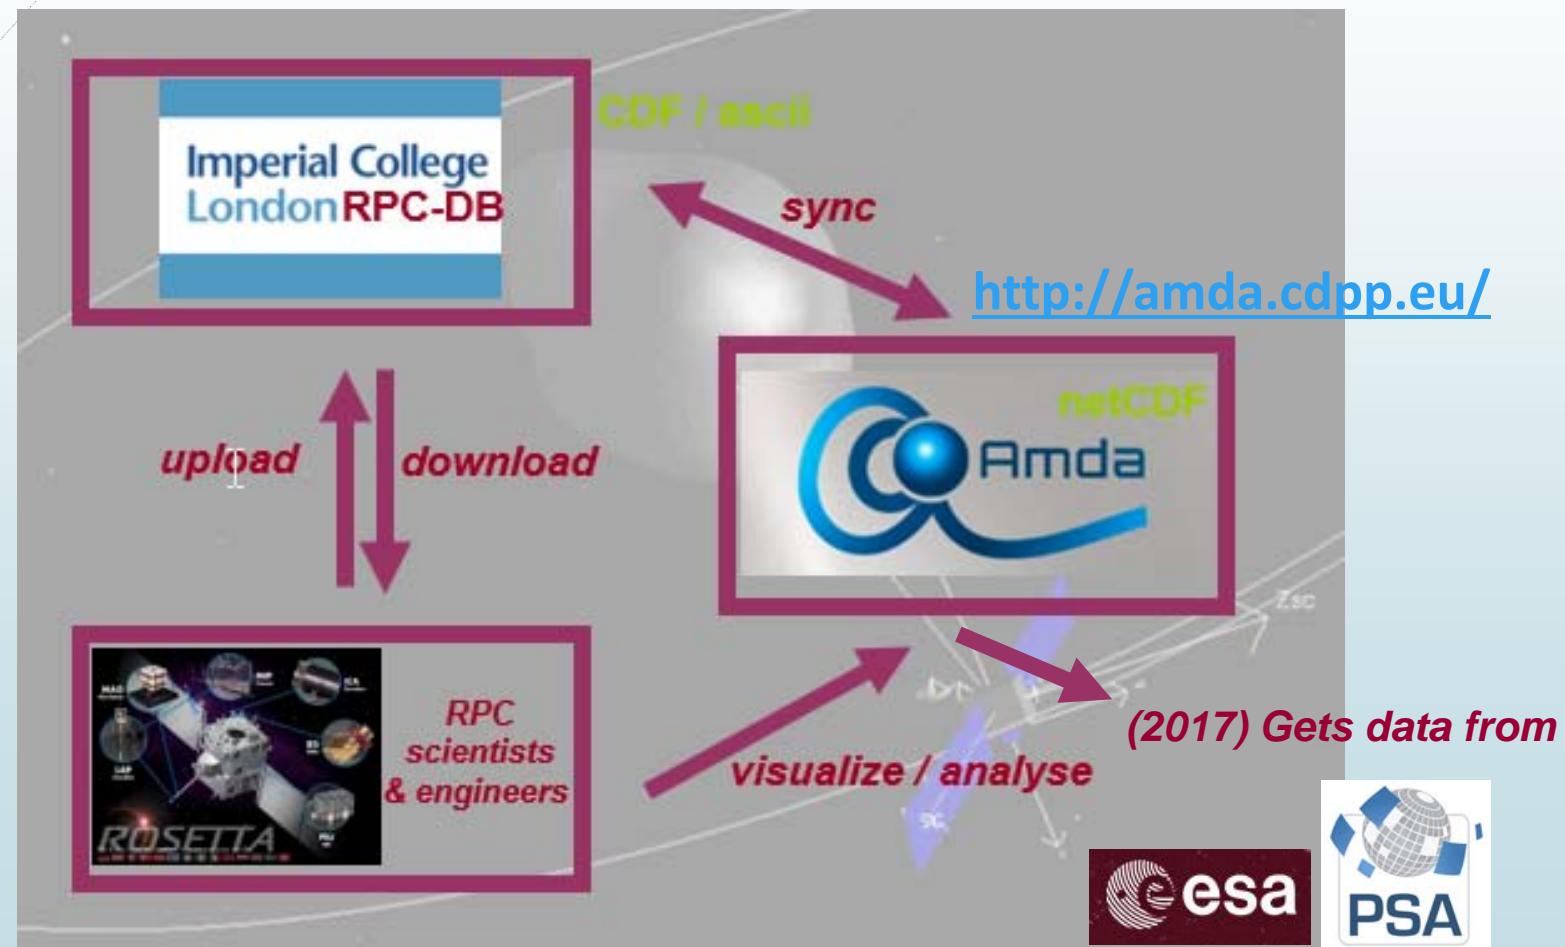

- ▶ Distribution des données plasma de Rosetta
 - ▶ Rôle de la base, rôle des outils
- ▶ Connexions du CDPP vers d'autres bases
 - ▶ Exemples: LESIA, LATMOS, LPP, IAS, ONERA ...
- ▶ Mise à disposition de modèles
 - ▶ « Run on request », mode « temps réel »
- ▶ Formation

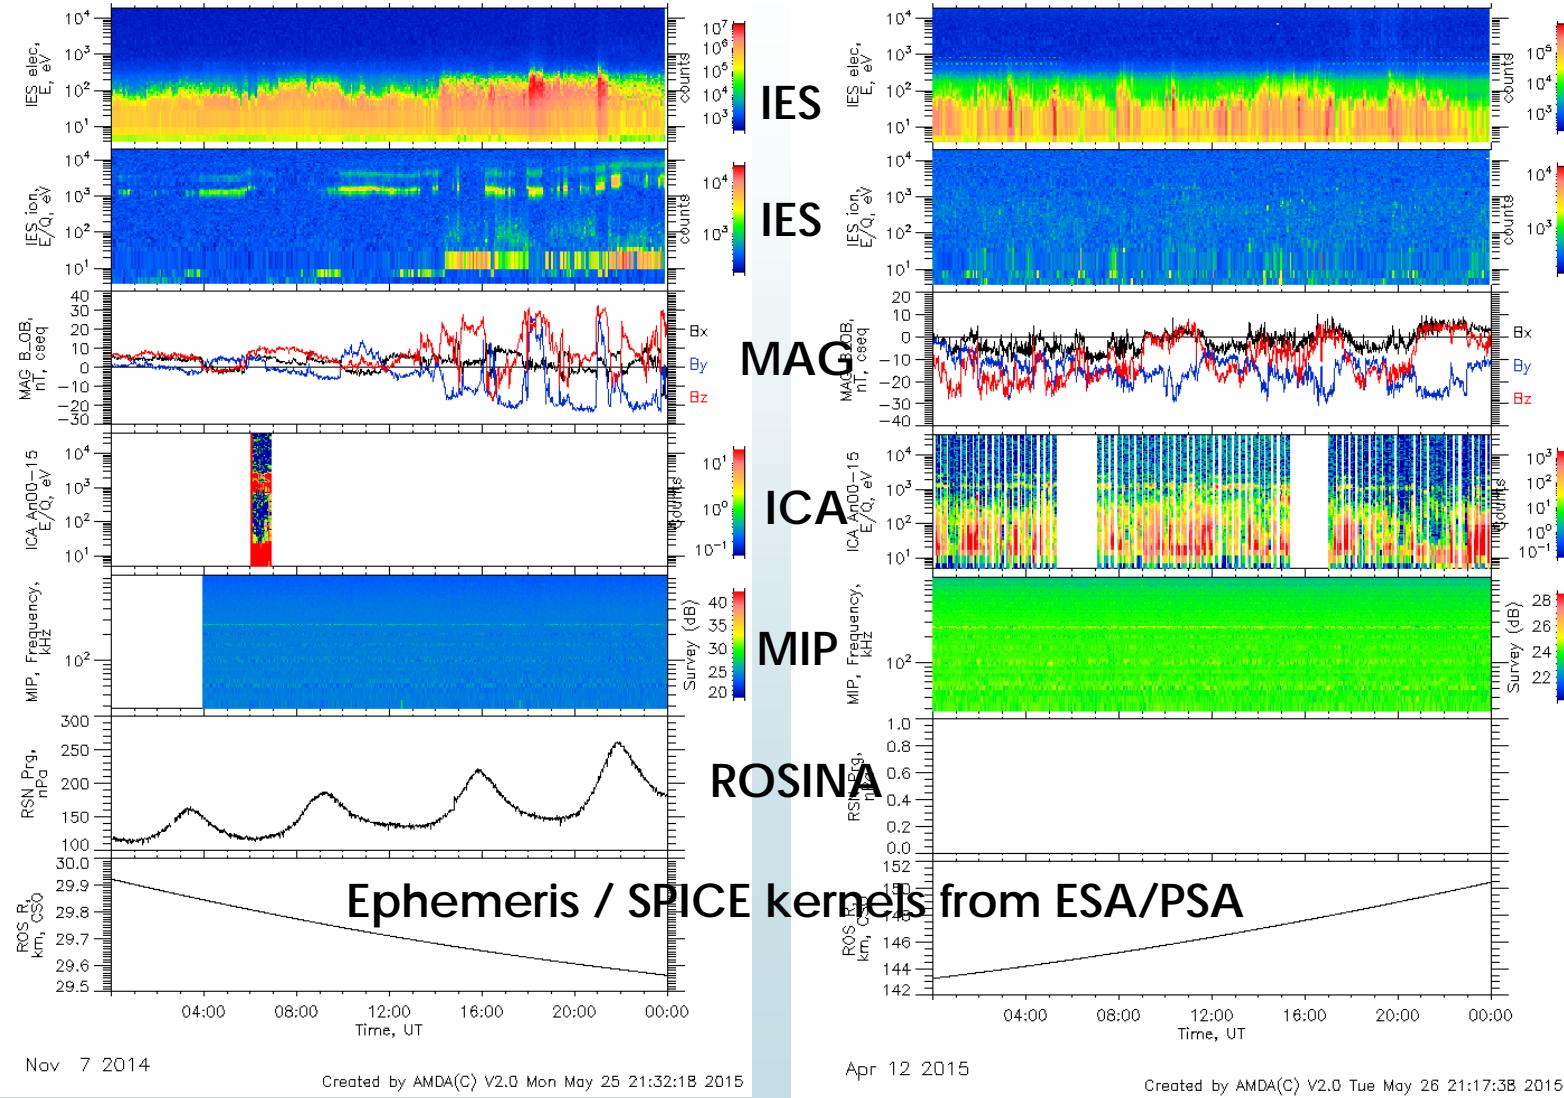

CDPP role in RPC data distribution and valorization

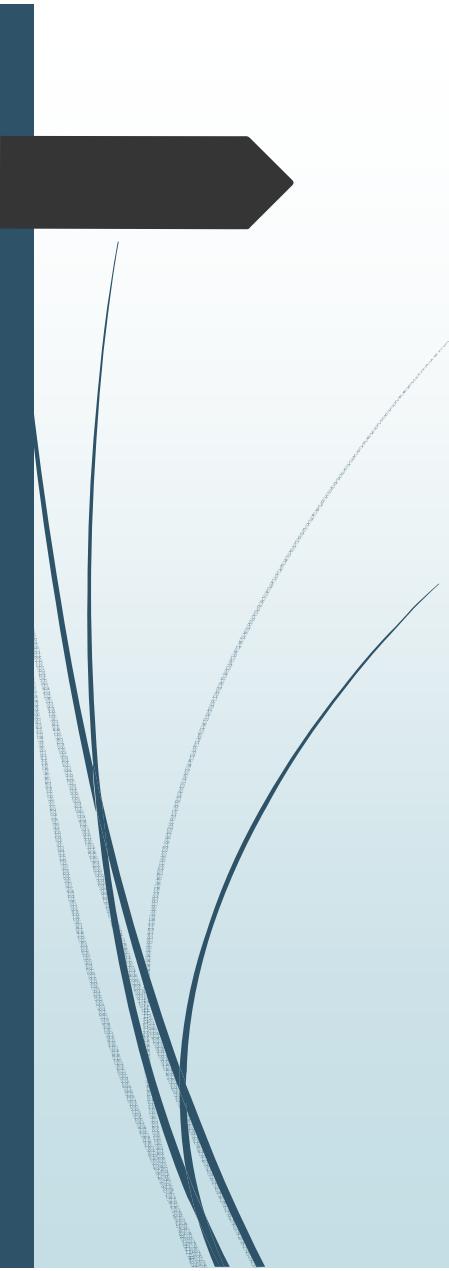

- ▶ Initial RPC pipeline: all teams sent their data to Imperial College London where they were transformed in CDF. No visualization is provided at the time
- ▶ *Spring 2014*: RPC leads ask CDPP to provide a quick-look system such that the team at large (including post-docs, PhD, ...) can browse data, select events, ...
- ▶ *Fall 2014*: CDPP proposes a customized version of AMDA where data from all instruments can be visualized. This environment is only accessed by the RPC team. RPC leads must give their approval before a new RPC user is registered.
 - ▶ <http://amda.cdpp.eu/>
- ▶ *October 2016*: end of operation
- ▶ *2017*: public data from PSA

Data distribution of RPC data during the proprietary phase

RPC data in AMDA

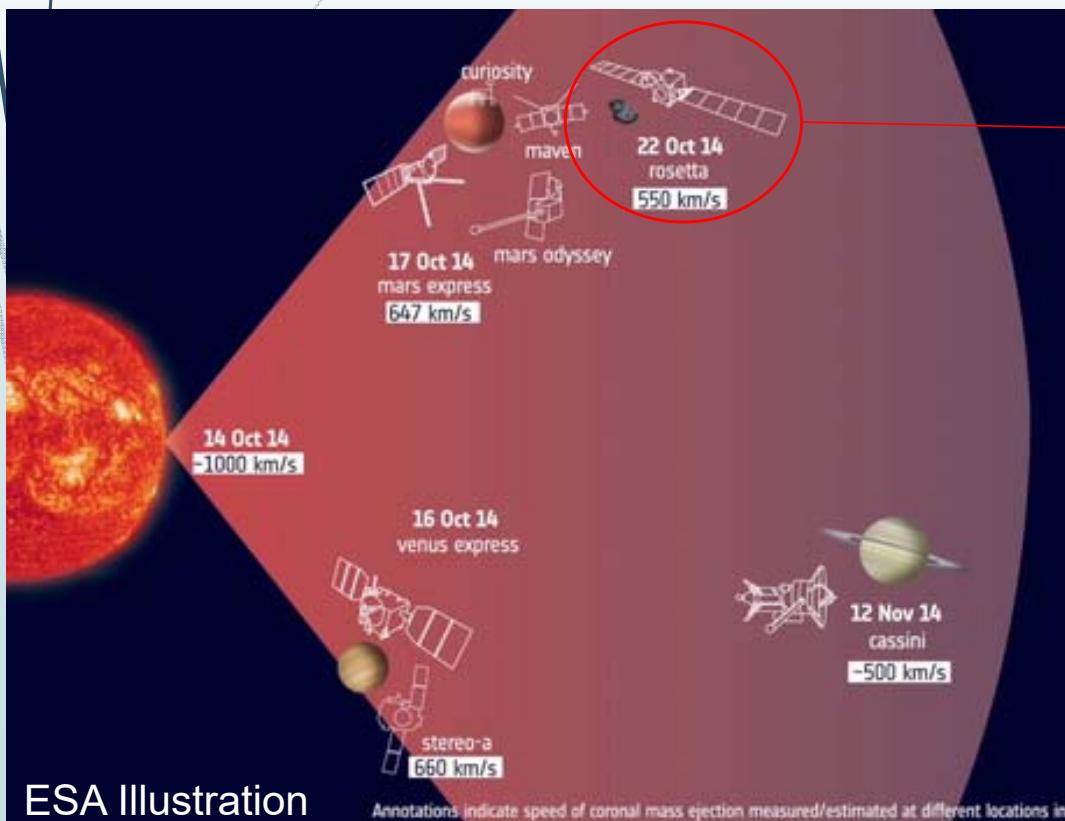

CDPP role in RPC data distribution and valorization

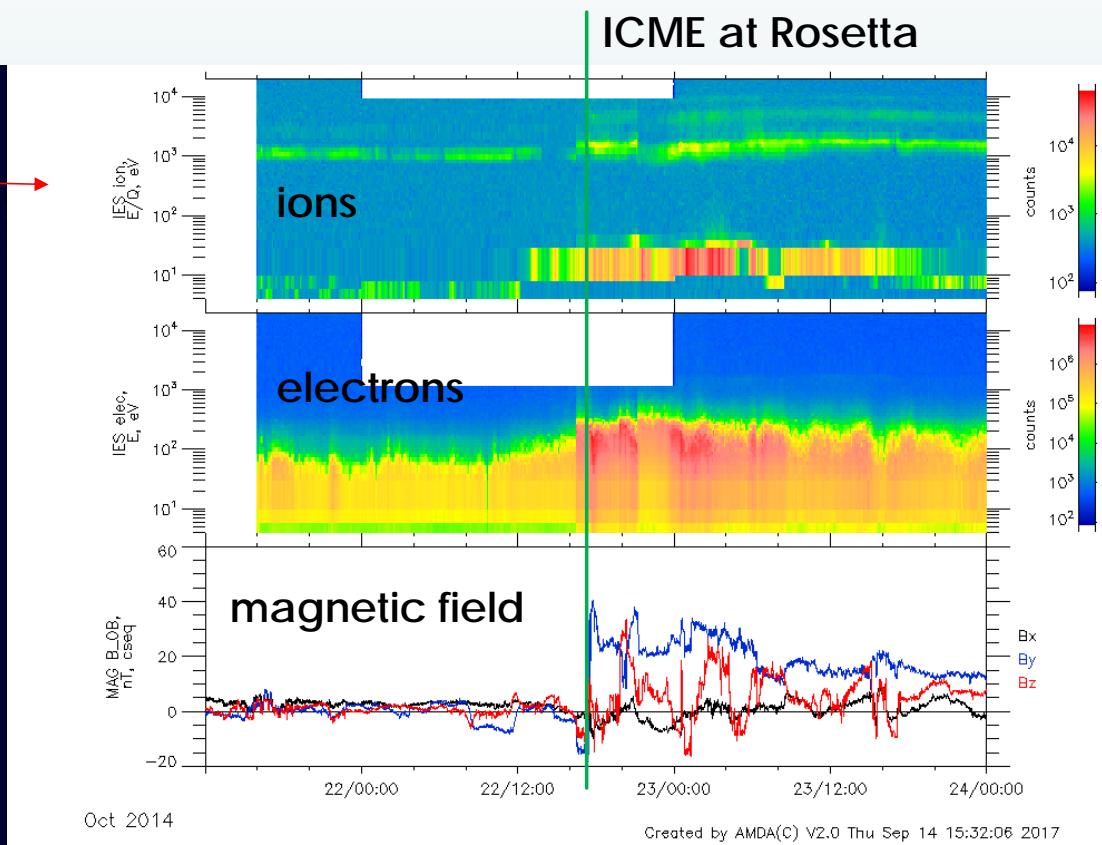

- ▶ An hands-on session (via Webex) was organized early in the project to have RPC scientists accustomed to the tool
- ▶ RPC data were available in AMDA but also in 3Dview (also only to RPC members)
 - ▶ <http://3dview.cdpp.eu/>
- ▶ Complementary data were made available to the scientists in AMDA:
 - ▶ Giotto and ICE data
 - ▶ model data : Solar Wind conditions propagated at 67P (1D MHD, *Tao et al.*, 2005)

Publications

Interplanetary coronal mass ejection observed at STEREO-A, Mars, comet 67P/Churyumov-Gerasimenko, Saturn, and New Horizons en-route to Pluto. Comparison of its Forbush decreases at 1.4, 3.1 and 9.9 AU,
Witasse et al., JGR 2017

ESA Illustration

CDPP role in data distribution and valorization

- ▶ The RPC team activity on AMDA accounted for 25% of traffic in 2015-2016
- ▶ Publications acknowledging AMDA were issued (*very important !*)
 - ▶ 8 in 2015, 12 in 2016, 8 in 2017
- ▶ The CDPP offered a wide environment of tools and complementary data
- ▶ This collaboration was a success from both RPC and CDPP points of view
- ▶ The CDPP aims at providing similar facilities for the next European Solar and Planetary missions (SO, JUICE)

Connectivité des outils du CDPP

FR

- ▶ MEDOC (IAS) : base solaire spatiale   
- ▶ APIS (LESIA) : base d'imagerie aurorale   
- ▶ SIIG (UNISTRA) : service des indices (*en dev.*) 
- ▶ CLWeb (IRAP) : base de données (*IMPEX*)  
- ▶ SciQlop (LPP) : catalogues/classification (*en dev.*) 
- ▶ ONERA : modèle de ceintures 

EU

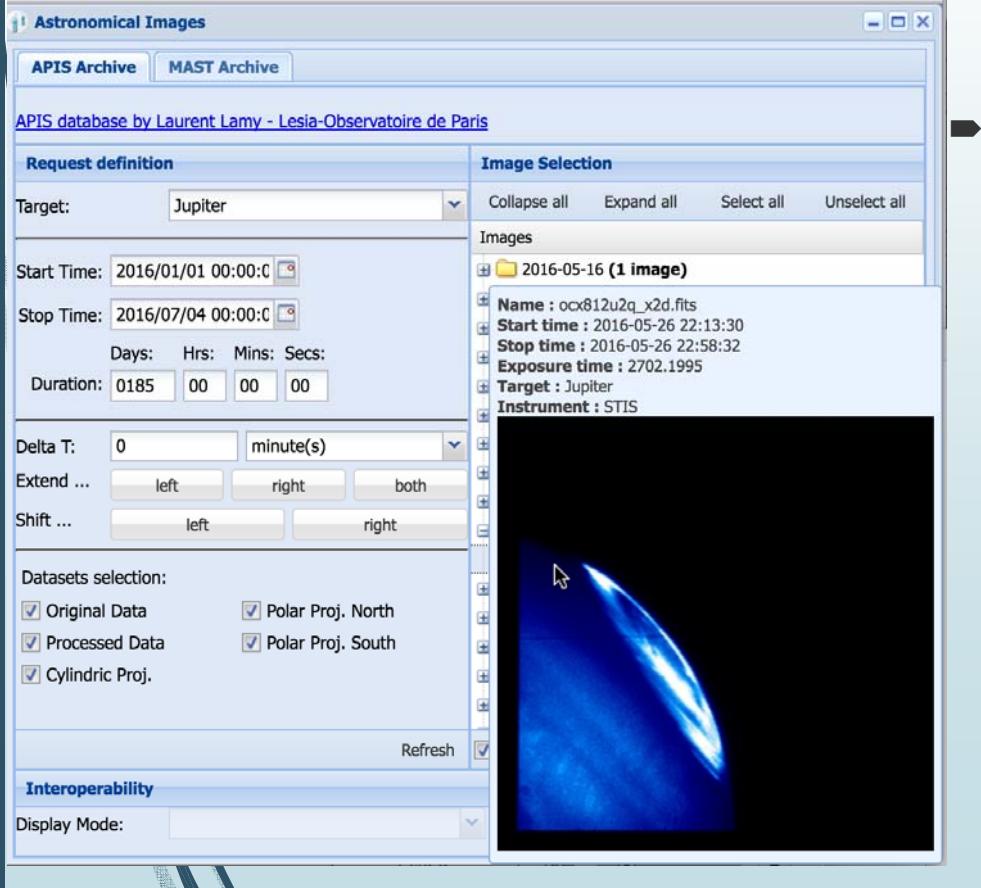

- ▶ Bases IMPEX : modèles et simulations en planétologie  
- ▶ CSA (ESA/ESAC) : archive des données Cluster (*en test*)   
- ▶ VESPA (LESIA) : registre des ressources EuroPlanet   

Int.

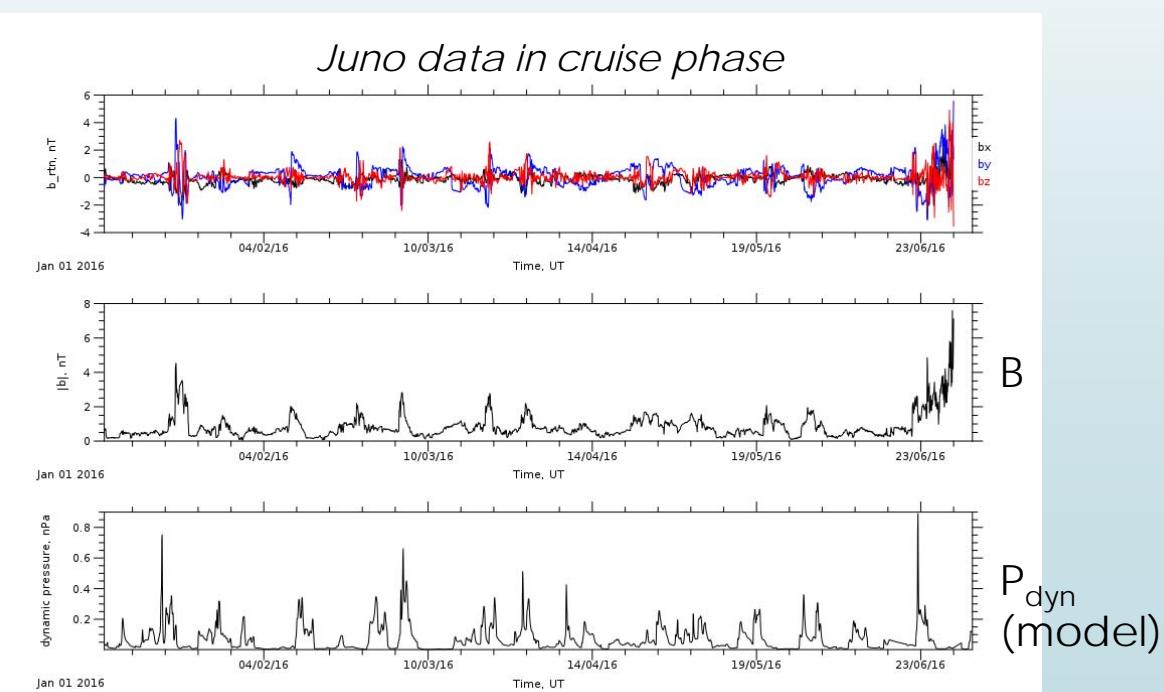

- ▶ CDAWeb (NASA/GSFC) : archive de données magnétosphériques  
- ▶ MAPSKP (U. Michigan/Cassini) : données Cassini 
- ▶ MAST : base d'imagerie aurorale du HST  
- ▶ CCMC : base de simulation (*démonstrateur*)  
- ▶ UCLA : simulations à Saturne (*démonstrateur*) 

Connexion à APIS (LESIA)

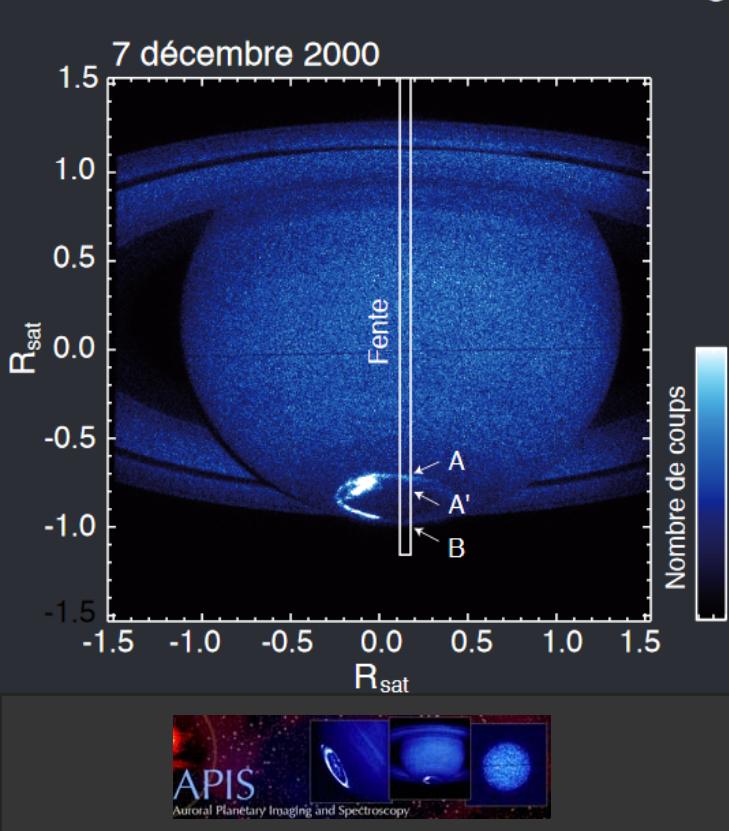

AMDA

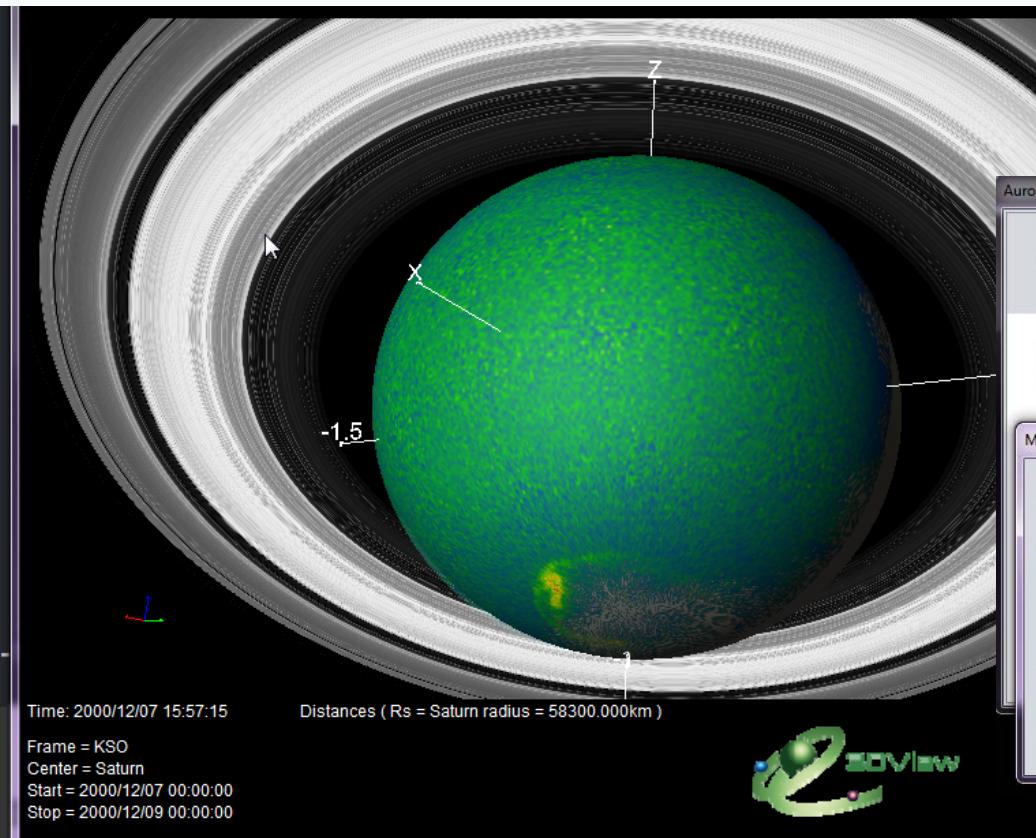

- ▶ La base APIS est accédée à la fois par AMDA et 3DView
 - ▶ Grâce au protocole EPN-TAP (VESPA)
 - ▶ AMDA (2010), 3DView et Propagation Tool (2017)
- ▶ Cf poster de L. Lamy et al.

Connexion à APIS (LESIA)

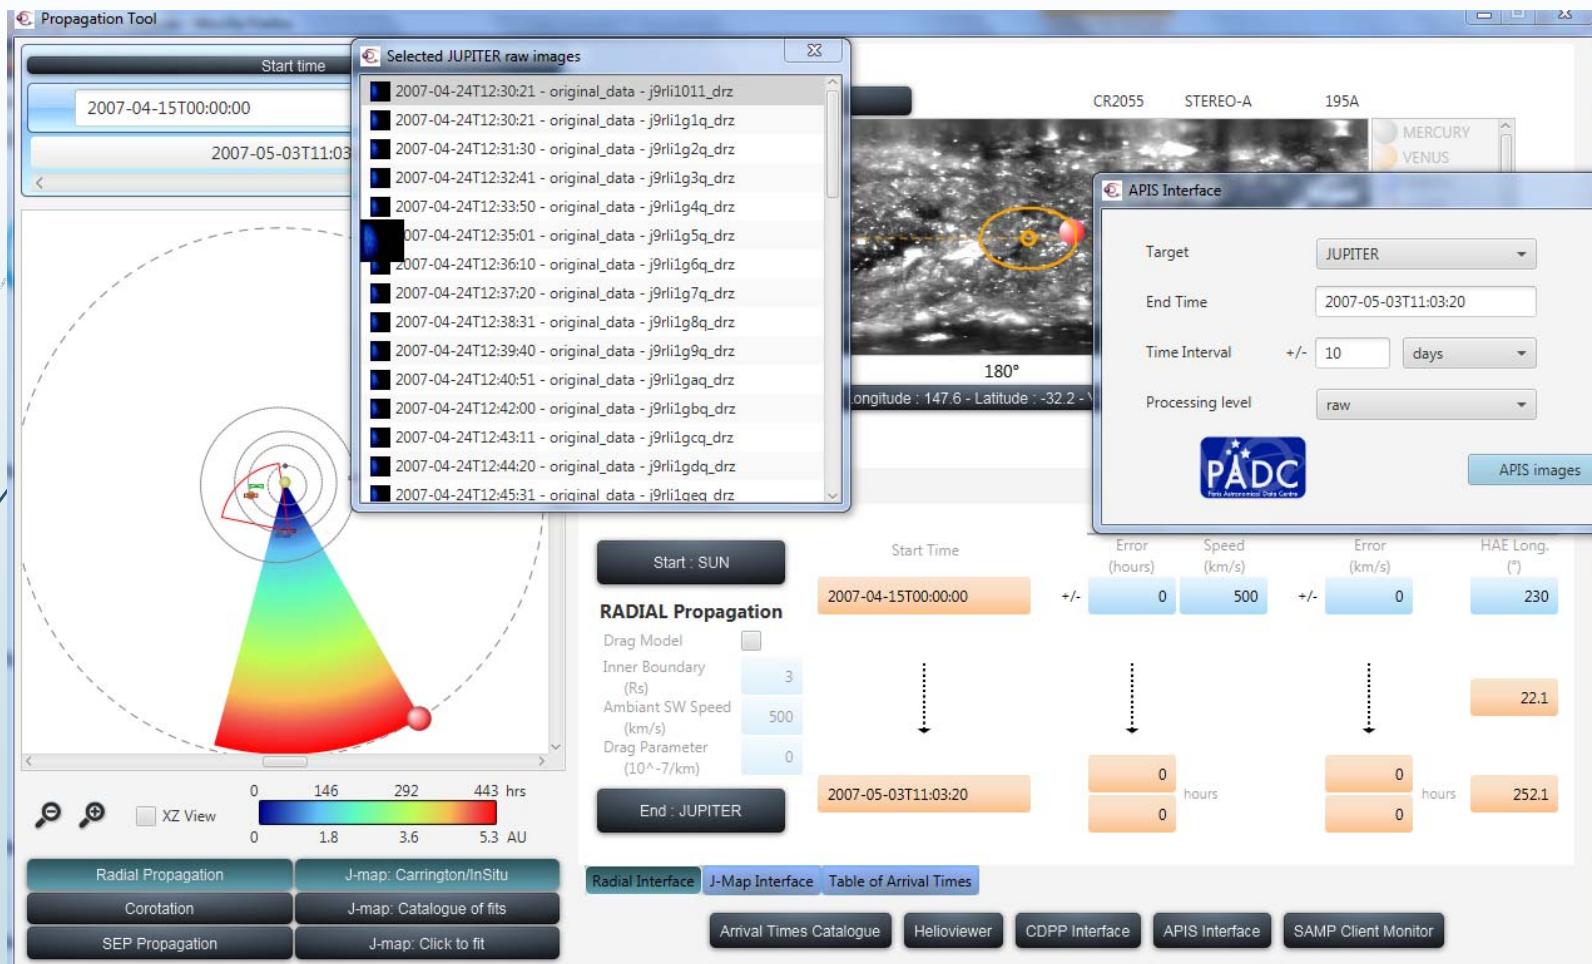

APIS

3DView

Affichage des images « processed »,

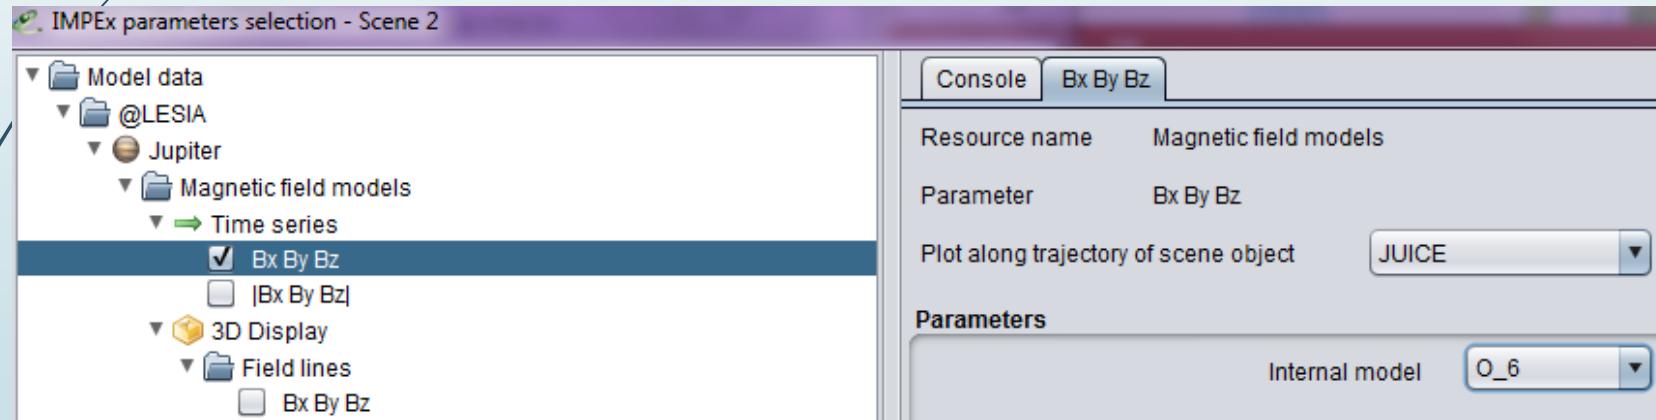

Connexion à APIS (LESIA)

Propagation Tool

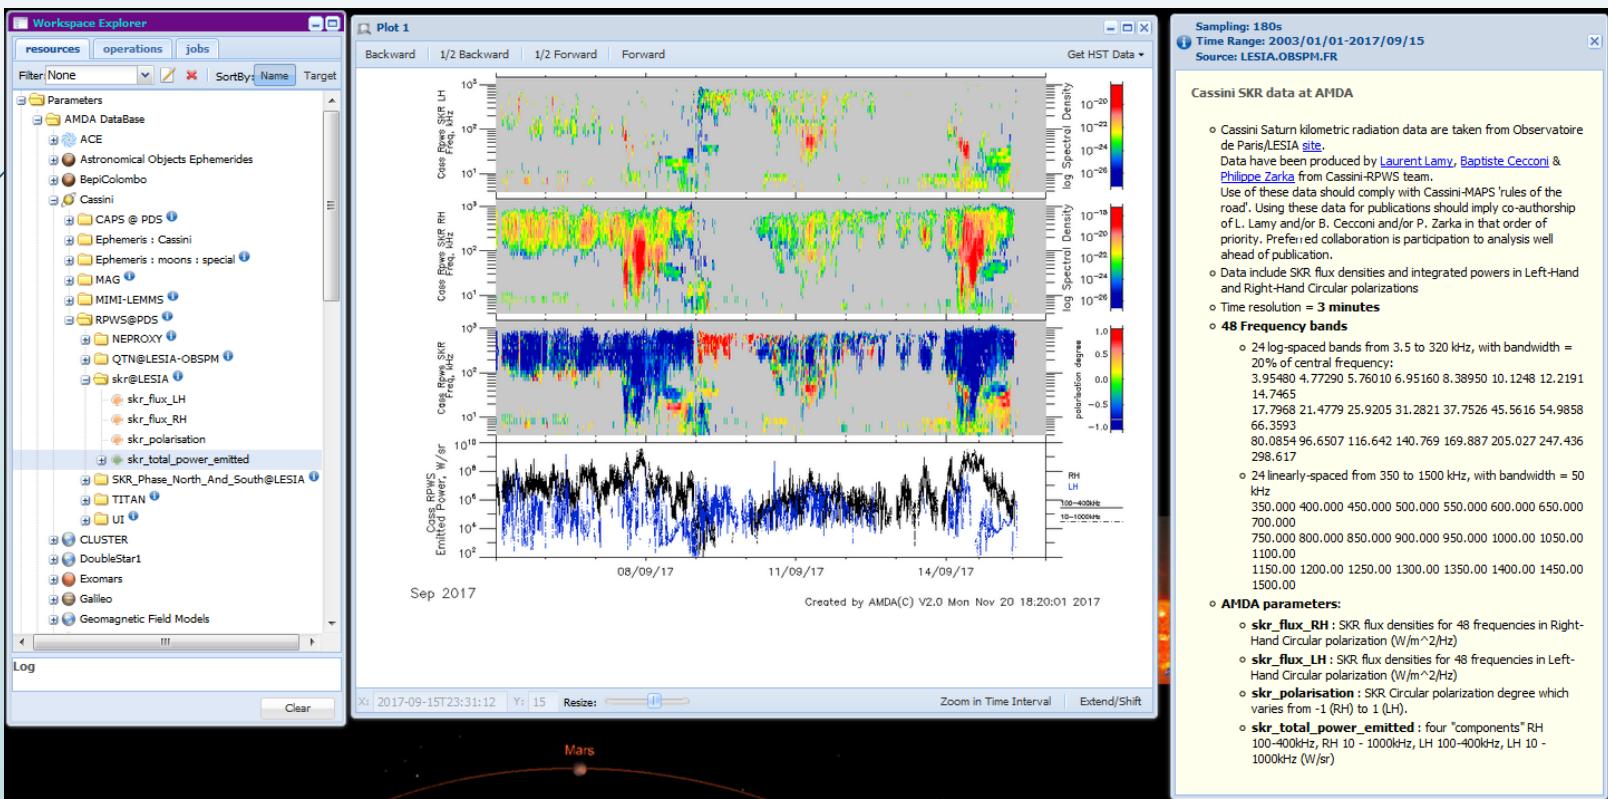

Connexion autre service (LESIA)

- ▶ Web service de calcul de champ magnétique
 - ▶ O6, VIT4, VIP4, VIPAL
 - ▶ Status ?

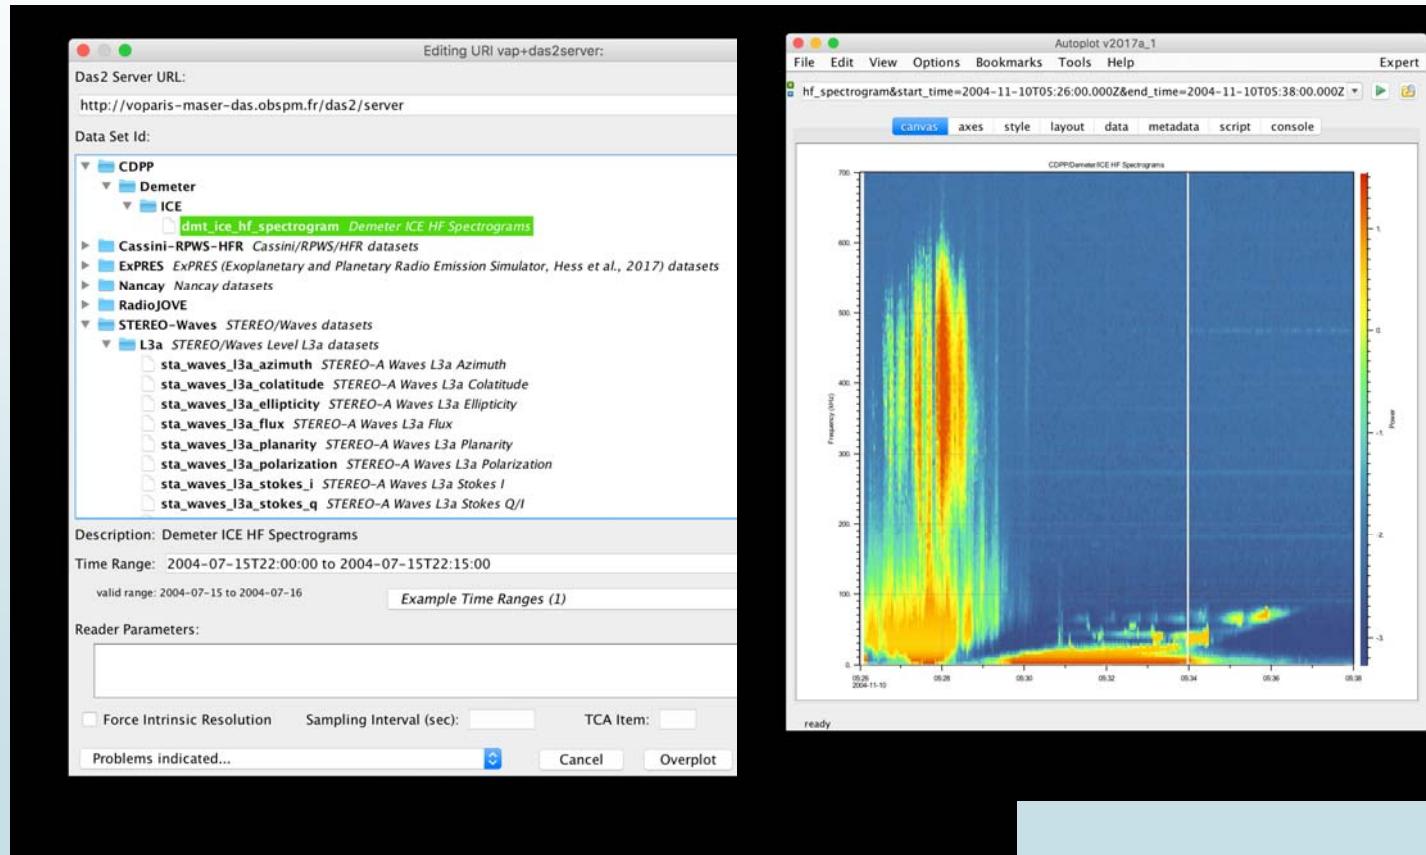

Connexion autre service (LESIA)

- ▶ Données RPWS/SKR de Cassini (2003-2017)
 - ▶ Envoi régulier des données par L. Lamy pour mise à disposition dans AMDA

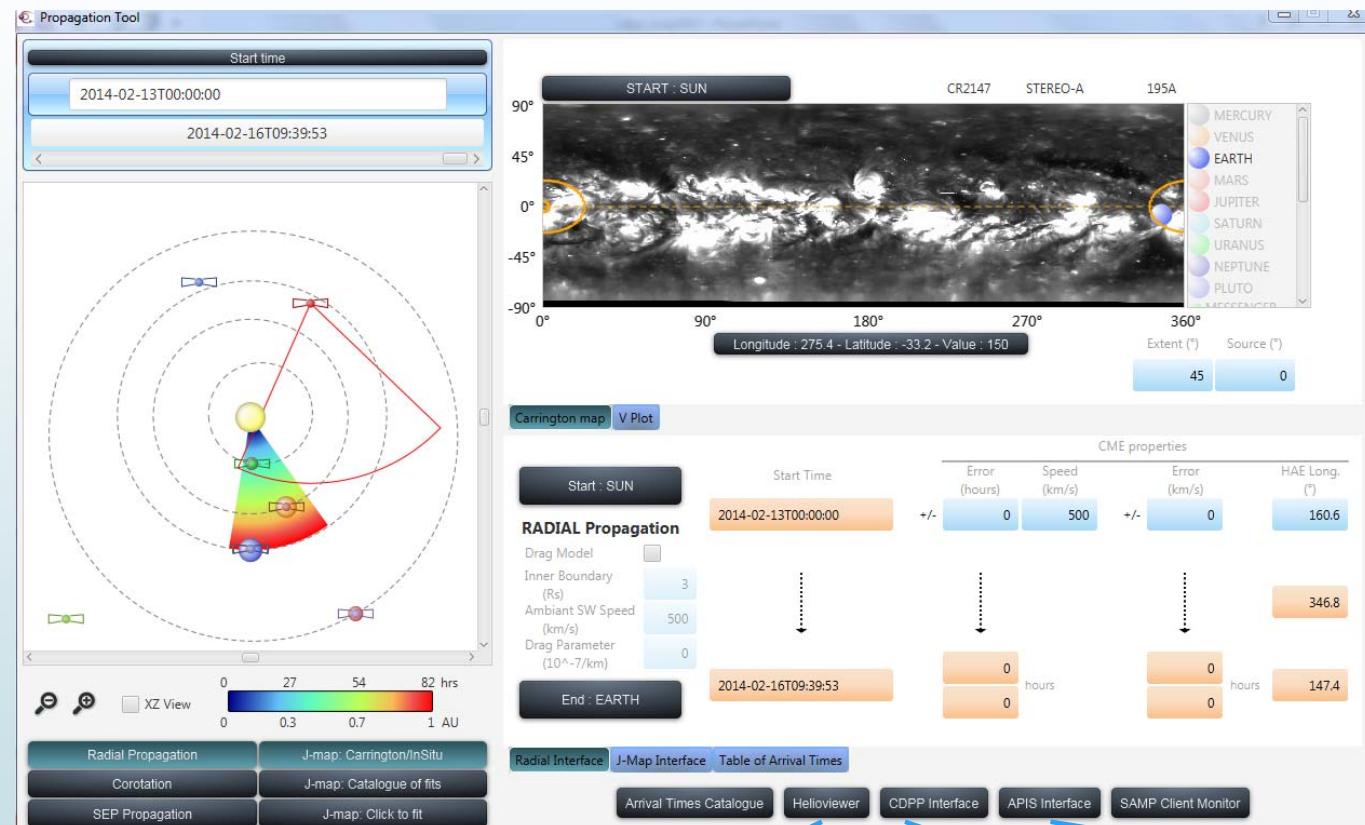

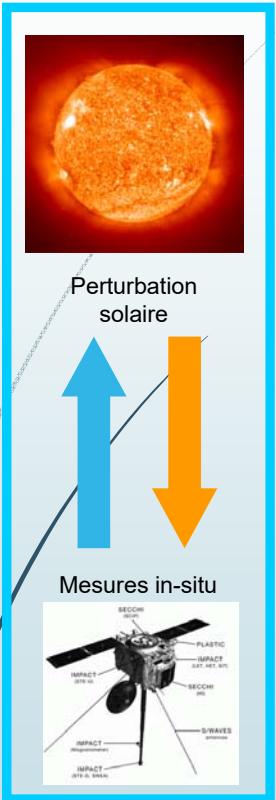

Connexion autre service (LESIA)

- ▶ Valorisation des données radio de l'archive CDPP
 - ▶ Serveur «das2» à Toulouse (à l'étude)
 - ▶ Fonctionnel au LESIA pour les données Voyager
 - ▶ Collaboration LPC2E/LESIA : module pour lire et distribuer les données Demeter/ICE Spectrogramme HF (B. Cecconi)

Exploitation du Propagation Tool

- ▶ L'outil a été utilisé pour plusieurs études
 - ▶ Catalogues de CIR : produits pour HELCATS et accessibles dans l'outil
 - ▶ Effets des CME sur les SEP
- ▶ Présentations régulières au groupe MADAWG (préparation à l'exploitation de Solar Orbiter)
- ▶ Publications 2017, surtout dans le cadre de HELCATS
 - ▶ Observational Evidence for the Associated Formation of Blobs and Raining Inflows in the Solar Corona, Sanchez-Diaz et al., The Astrophysical Journal Letters, 835, 1, article id. L7, 7, 2017a
 - ▶ The temporal and spatial scales of density structures released in the slow solar wind, Sanchez-Diaz, E., et al., submitted to Astrophysical Journal, 2017b
 - ▶ The magnetic connectivity of coronal shocks from behind-the-limb flares to the visible solar surface during gamma-ray events, Plotnikov, I., et al., Astronomy and Astrophysics, In Press, DOI [10.1051/0004-6361/201730804](https://doi.org/10.1051/0004-6361/201730804) 2017
 - ▶ Rouillard et al., A propagation tool to connect remote-sensing observations with in-situ measurements of heliospheric structures, Planetary and Space Science, doi:10.1016/j.pss.2017.07.001, 2017

Participation du CDPP au SSA / Heliospheric-Expert Service Center

Heliospheric Weather Expert Service Centre

This page provides access to the latest data, products and analysis tools from the SSA SWE Heliospheric Weather Expert Service.

PROPTOOL (circled)

Coming soon:

- CME/CIR/SEP arrival times at all planets/probes/comets
- Tracking of heliospheric structures using white light J-maps
- Access catalogues of CME / CIR trajectories
- Connect in-situ (AMDA) and imagery (JHelioviewer/MEDOC) databases

ESWF

- Empirical Forecast

DBM

- CME E Model

AWARE

- Automated near-Earth alerts

AMDA (circled)

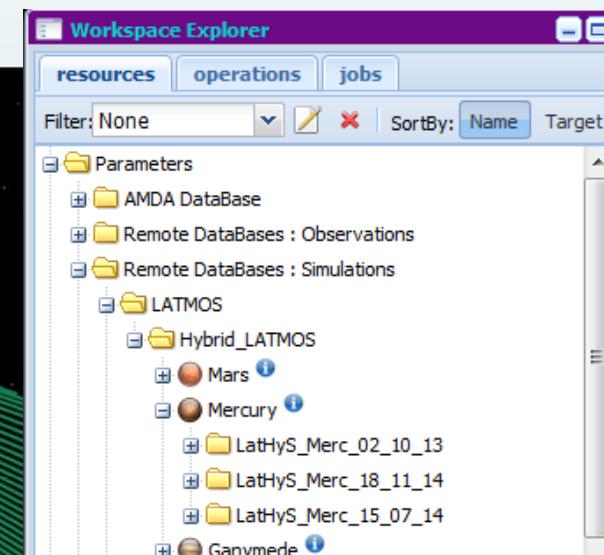

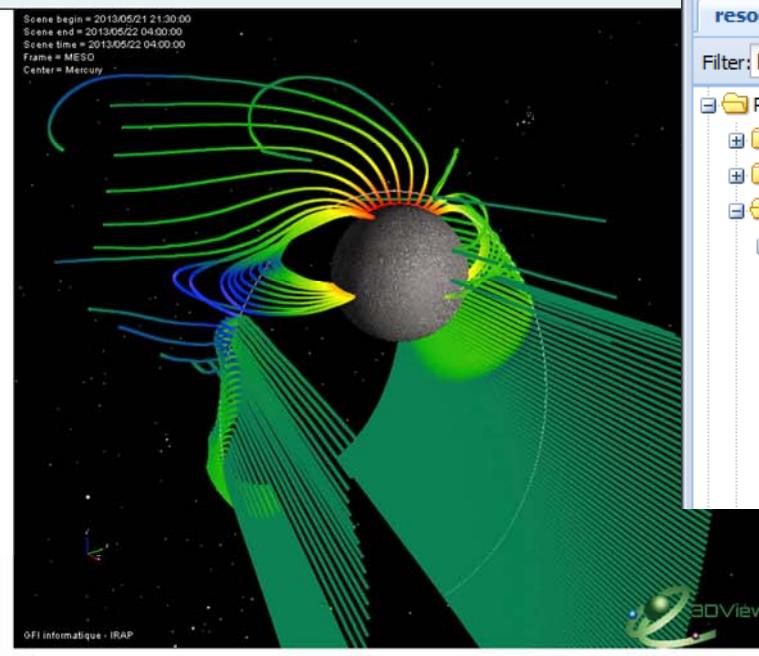

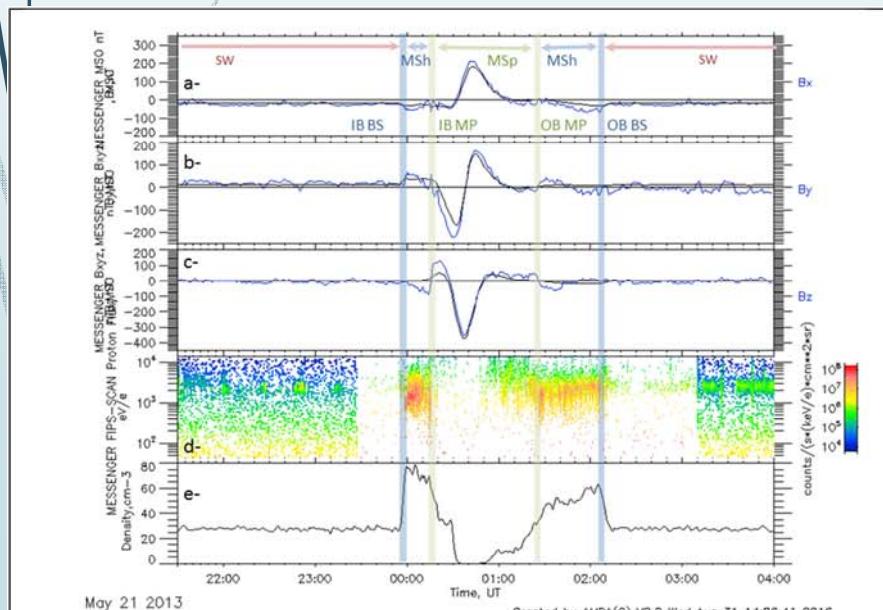

- Archive of planetary/solar wind/Earth magnetosphere & ionosphere missions and ground-based assets
- Supporting models: magnetic footprints, magnetic fields, solar wind propagation at planets and probes, ...
- Access to external databases for observations and simulations (hybrid, MHD)
- Embedded plotting, data mining, and cataloguing functionalities

Solar Wind Forecast (ENLIL MHD) [SELSWE]

EUV Coronal Hole Analysis [ESWF]

Connexion à LatHyS (LATMOS)

- ▶ Visibilité des simulations hybrides Mars/Mercure/Ganymède du LATMOS
- ▶ Comparaison données/observations depuis AMDA et 3DView
- ▶ Connexion (=protocole/standards) réalisée dans le cadre d'IMPEX (2011-2015)

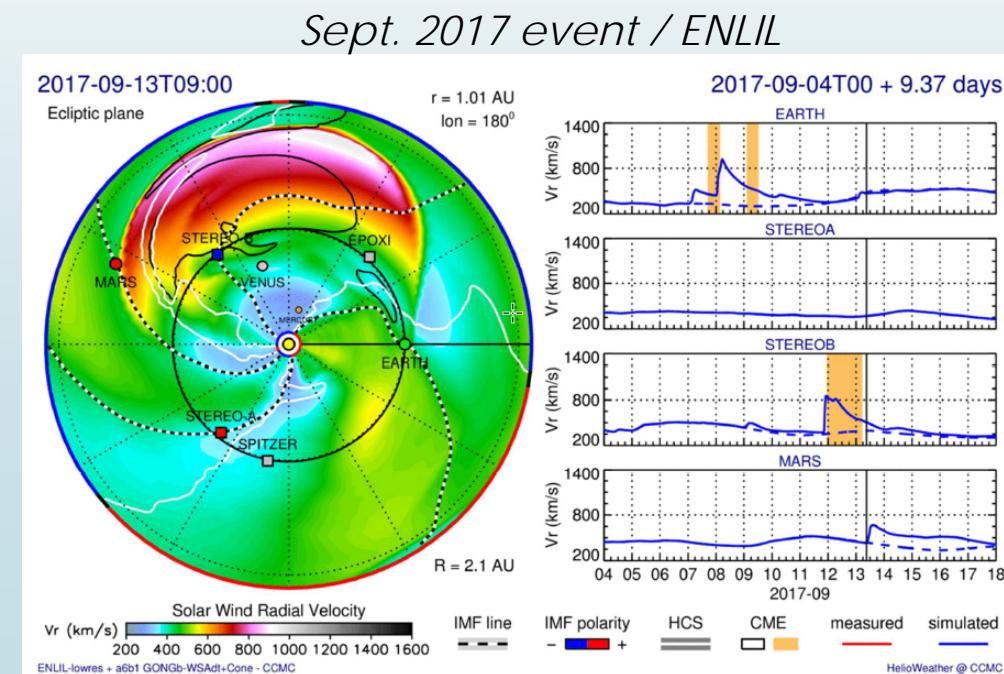

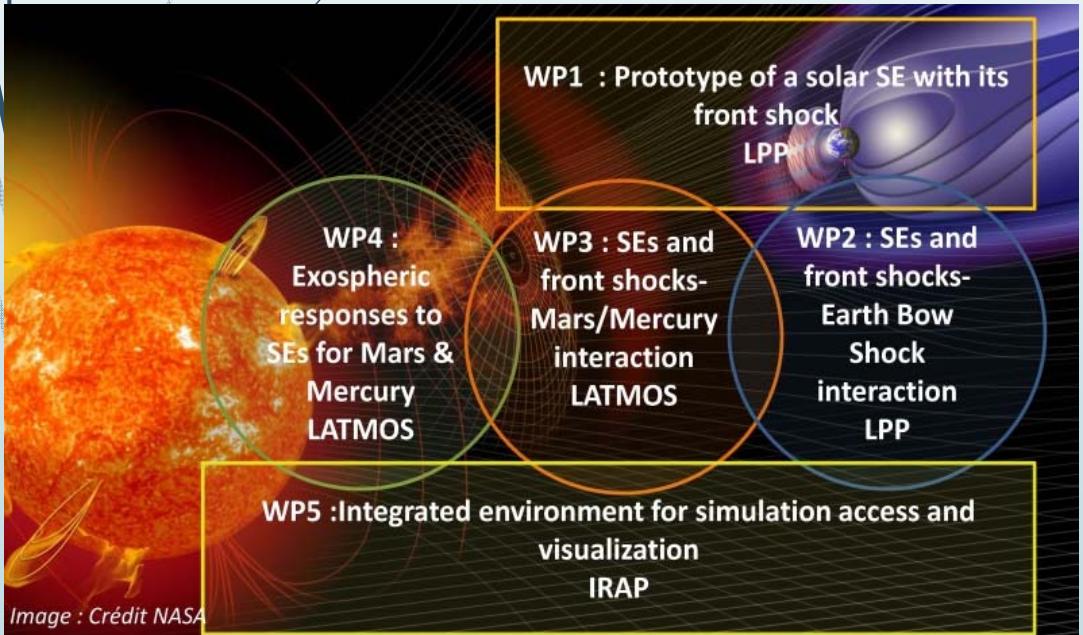

A

B

Génot et al., 2017

Connexion à LatHyS (LATMOS)

- ▶ Continuité avec le démarrage de l'ANR TEMPETE en 2018 (= Temporal Evolution of Magnetized Planetary Environments during exTreme Events)
- ▶ Simulations dépendantes du temps / évolution des outils
- ▶ Cf poster (R. Modolo et al.)

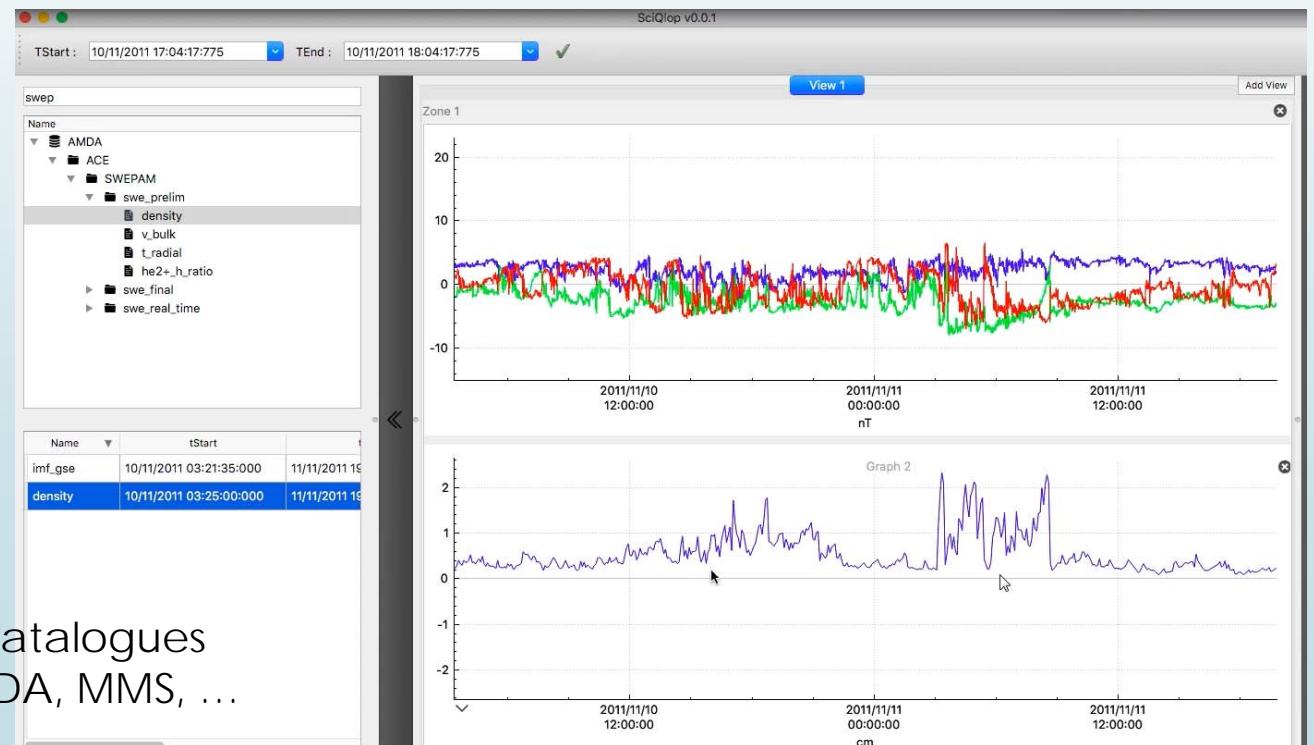

Connexion à SciQlop (LPP)

- ▶ Connexion de SciQlop à AMDA
 - ▶ Utilisation des WS d'accès aux données d'AMDA
- ▶ Cf dernière présentation orale de la journée (N. Aunai et al.)

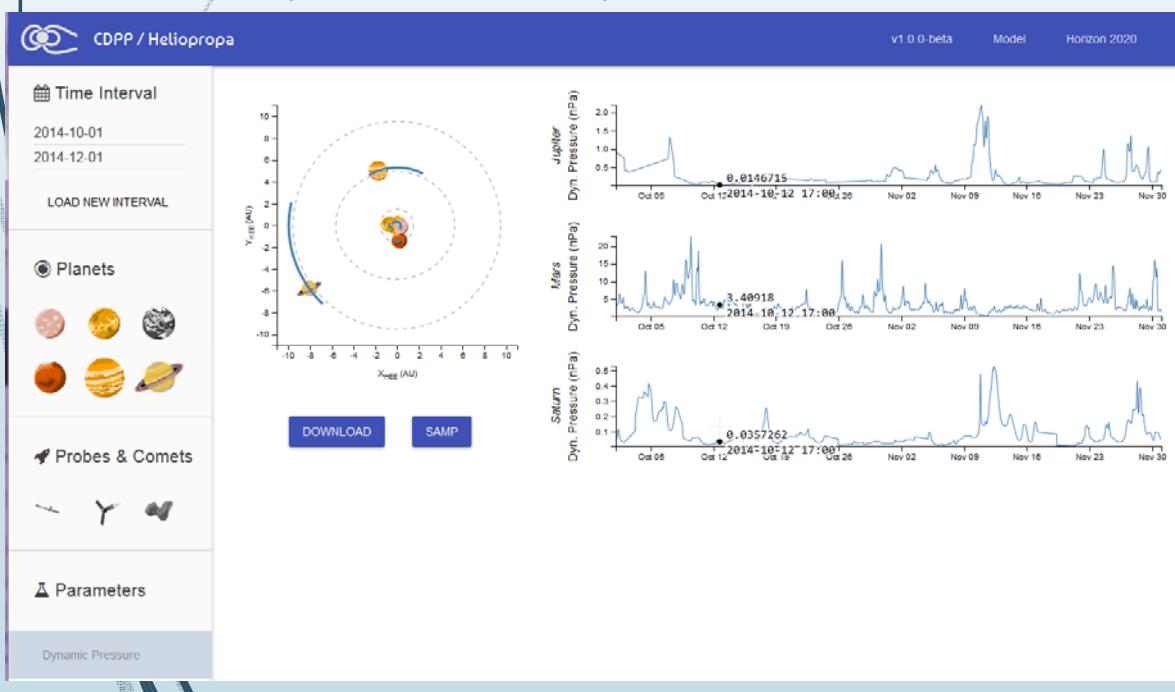

- Identification de regions, catalogues
- Connexion à CDAWeb, AMDA, MMS, ...

Mise en ligne de modèles

<http://heliopropa.irap.omp.eu/>

- Mise à disposition des résultats de vent solaire propagé à différentes planètes et sondes (code 1D MHD *Tao et al, 2005*)
- Interface web → appel à AMDA → visualisation
- Utilisation de données « real time » (ACE, DSCOVR) pour une prédition à qq jours pour Mars et Jupiter

- Suivi facilité de perturbations dans l'héliosphère
- Proposé à SSA / H-ESC P3 (en négociation)
- Mise en place d'un service d'alertes (VOEvent)
- Financement Europlanet/PSWS

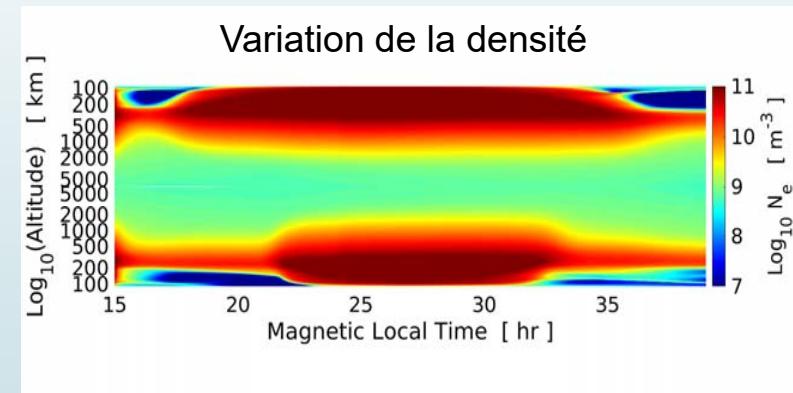

Mise en ligne de modèles

<http://transplanet.irap.omp.eu/>

- Mise en ligne du code ionosphérique IPIM (*Blelly & Marchaudon, 2015*)
- Extension à Mars, Jupiter, Vénus (new)
- Interface web → calculateur → base de données de résultats

The screenshot shows the Transplanet web interface. At the top, there's a navigation bar with links for 'View Results', 'Request Run', 'Acknowledgements', 'Publications', 'Links', and 'License'. The version 'v2.3.0' is displayed in the top right. Below the navigation is a section titled 'REQUEST A NEW RUN' featuring icons for Earth, Mars, Jupiter, and Venus. The 'USER' section includes fields for 'Email' (your@email.net) and 'Description' (optional, but recommended). The 'SPECIES' section lists various ions with checkboxes: H, N, H+, O, O+, N2, O2, O+, NO+, N2+, and O2+. The 'TIMESPAN' section includes fields for 'Simulation start date' (20/03/2015), 'Simulation start time' (15:00:00), 'Simulation duration' (01:00:00), and 'Output time interval (s)' (60). On the right, a table titled 'RUNS (103)' lists 103 entries with columns for Initiated, User, Id, Description, Kti, Kpi, Mag, Atm, and a delete icon. The first few rows show runs initiated from 1 day ago to 1 month ago.

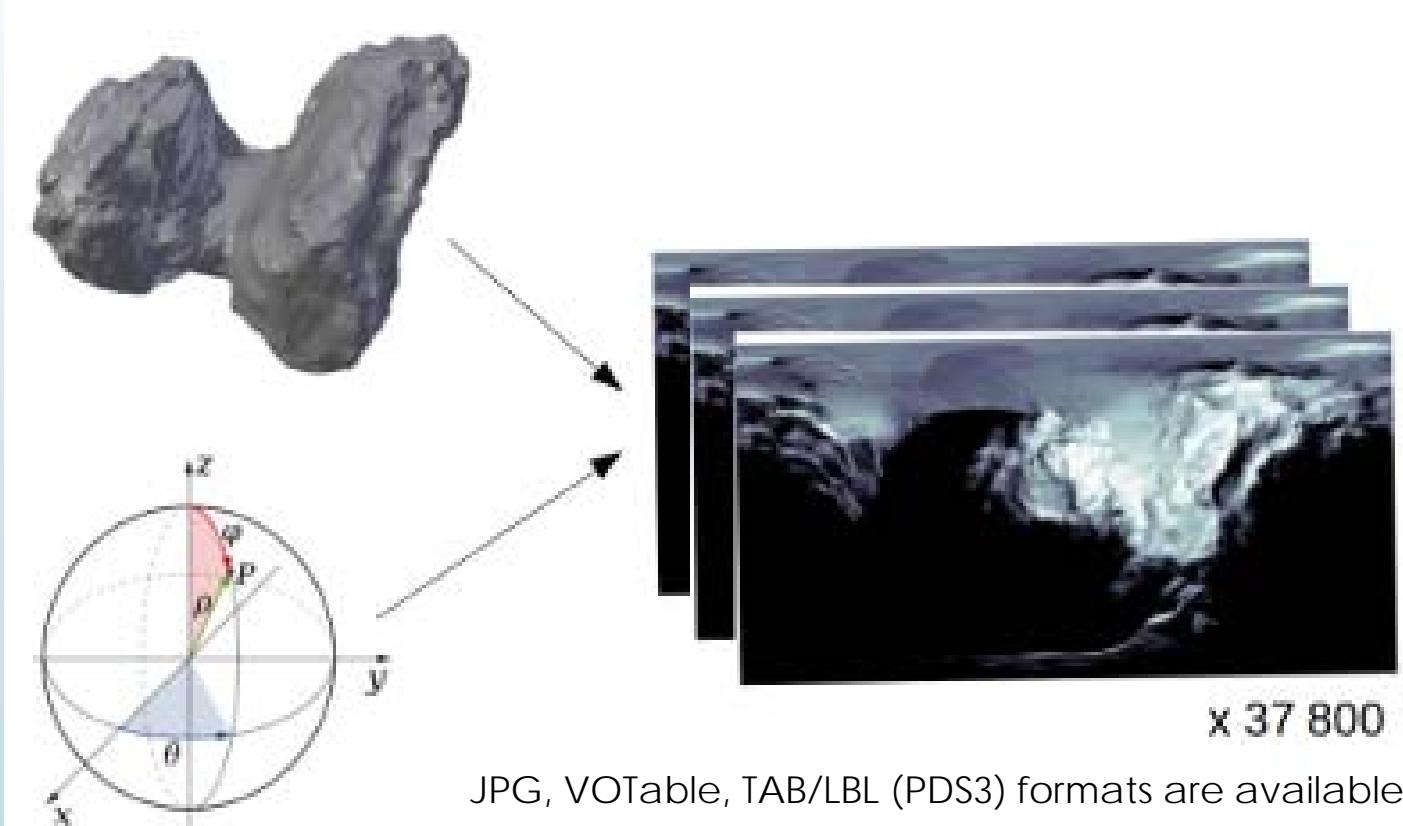

Initiated	User	Id	Description	Kti	Kpi	Mag	Atm	⋮
1 day ago	Mikel Indurain	MIKEL.INDURAIN	First Venus Test	4h	60s	✓	1 No B field	Hedin Model
12 days ago	Killian Thezelais	KILLIAN.THEZELAIS	Simul. T. 1day	24h	60s	✓	2 IGRF	MSIS
12 days ago	Kthezelais	KTHEZELAIS	test Terre	1h	60s	✓	1 IGRF	MSIS
13 days ago	Killian Thezelais	KILLIAN.THEZELAIS	test	10m	60s	✓	1 IGRF	MSIS
1 month ago	Japheth Yates	JAPHETH.YATES		5m	60s	✓	1 VIPAL	(Generic) Galileo
1 month ago	B Sanchezcano	B.SANCHEZCANO	test	1h	60s	✓	1 No B field	MCD

- Plusieurs dizaines de simulations disponibles
- Test d'architecture pour d'autres codes
- Intérêt exprimé par SSA / I-ESC (en discussion)
- Financement Europlanet/PSWS

Illumination maps of comet 67P

- Collaboration with Imperial College London (code by A. Beth)
- Deliverable for ESAC
- VESPA service

JPG, VOTable, TAB/LBL (PDS3) formats are available

Availability in

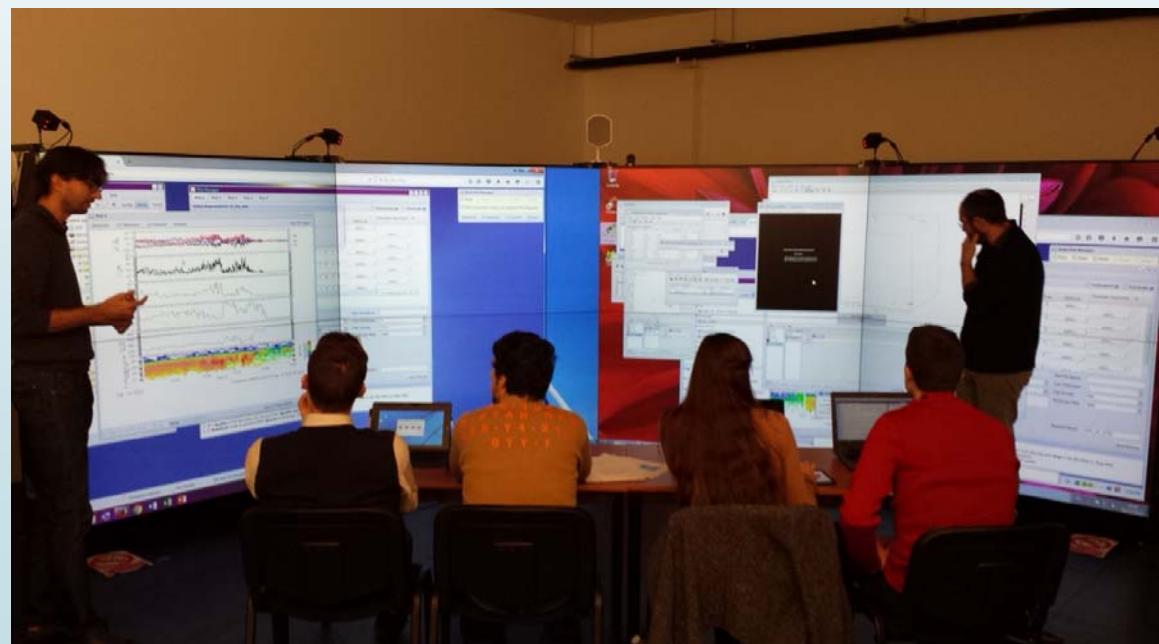

- ▶ EPN TAP server for AMDA data
- ▶ EPN TAP clients developed in AMDA, 3DView and the Propagation Tool
- ▶ See S. Erard's presentation

The screenshot shows the VESPA interface with a dark blue header featuring the VESPA logo and a hand cursor icon. Below the header is a navigation bar with tabs: All VO, Custom resource, Direct Query, Advanced Query, and Help. To the right of the navigation bar is a "Plotting tools" section listing TOPCAT, Aladin, SPLAT, CASSIS, and 3DView. Below the navigation bar is a section titled "EPN Resources" containing a list of various datasets with their descriptions and result counts. Three green arrows point from the text in the previous slide to the corresponding sections in the VESPA screenshot.
